Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

Overview

The on-site Prison Rape Elimination Act (PREA) compliance audit of Kintock Newark (KN), located in Newark, NJ was conducted on September 19-20, 2018 by U.S. Department of Justice certified PREA auditor, James L. Roland Jr., Nakamoto Group, Inc. The standards used for this audit became effective August 20, 2012. The Auditor conducted an opening meeting, toured the entire facility, interviewed a random sample of staff and residents, and reviewed PREA related staff and resident documentation. Upon completion of the audit process, a closing meeting was held with the administrative staff to discuss the audit process, preliminary findings, and the post-audit process. Employees at the facility were found to be extremely courteous, cooperative, and professional. All areas of the facility were found to be clean and well maintained. During the completion meeting, the auditor thanked the staff for their hard work and dedication to the PREA process.

Pre-Audit Phase

On August 3, 2018, PREA Audit Notices in English and Spanish were sent to the facility to be posted. The Auditor observed these postings during the tour. The notices were posted in the living units, at the main entrance, and in the visitation area. These notices were posted for six weeks pre-audit. The Auditor received no correspondence from residents or staff.

Kincock Newark staff were asked to complete the Pre-Audit Questionnaire (PAQ) also provided to the facility on August 3, 2018. The completed PAQ and supporting documentation was received by the Auditor on June 15, 2018. The documentation was reviewed by the Auditor including educational materials, training logs, posters, brochures, agency policies and procedures, forms, organizational charts, and other PREA related documentation.

On August 20, 2018, the Auditor requested additional information including, but not limited to, staff rosters, resident rosters, investigations for review, residents self-identified as LGBTI, resident reports of sexual abuse/harassment, residents who are Limited English Proficient (LEP), and examples of the KN screening instrument. These documents were provided and reviewed at the time of the audit.

On-Site Audit Phase

An opening meeting on the morning of September 19, 2018 at the KN facility with administrative staff. The audit schedule and process was discussed during the meeting. Including the Auditor, those present at the meeting were:

- Site Administrator
- PREA Coordinator
- Corporate Directors (three)
- Director Of Human Resources
- Director of Operations

The Auditor was provided a private conference room in which to conduct business and confidential interviews. All requested files and rosters, both staff and resident, were made available to the Auditor for review.

Site Review

Immediately following the opening meeting, a tour of the facility were completed. The Auditor was escorted by the Site Administrator/PREA Compliance Manager, the PREA Coordinator, and the Corporate Director, Director of Operations, and the Manager of Security. During the tour, the auditor reviewed PREA related documentation and materials located on bulletin boards and pertinent entries made in electronic logs. The auditor assessed camera surveillance, physical supervision, and electronic monitoring capabilities. Other areas of focus during the facility tour included, but were not limited to, levels of staff supervision, and limits to cross-gender viewing. All signs and postings were in both English and Spanish. Residents can shower, dress, and use the toilet facilities without exposing themselves to employees of the opposite gender. Informal and formal conversations with employees and residents regarding the PREA standards were conducted. Postings regarding PREA violation reporting and the agency's zero-tolerance policy for sexual abuse and sexual harassment were prominently displayed in all living units, meeting areas, and throughout the facility. Audit notices with the PREA auditor's contact information were posted in the same areas. The audit notices were posted on August 3, 2018. Unimpeded access to all areas of the facility was provided to the Auditor.

Resident Interviews

At the time of the audit there were 340 male and three female residents housed at KN. A total of 23 male residents and three female residents were interviewed, representing (8%) of the male population and (100%) of the female resident population. There was one LEP resident, one physically disabled, one resident self-identified as transgender, and one self-identified bisexual resident interviewed. The facility had no residents who reported sexual abuse and no residents who reported sexual victimization during risk screening. No residents refused to be interviewed. Interviews were conducted using the Department of Justice (DOJ) protocols to access resident's knowledge of PREA and the reporting mechanisms available to them.

Staff Interviews

Kintock Newark (KN) employs 86 staff. Thirty staff members were interviewed, including 20 Resident Supervisors (from all three shifts) and ten administrative/specialized staff. The administrative staff included the Site Administrator, Human Resources Director, and Corporate Director of Facility Operations. Specialized staff included the Food Service Director, a Counselor, and a Licensed Practical Nurse. All staff members have been trained to act as first responders when a PREA related incident occurs.

The Auditor connected telephonically with the Program Director of the Sexual Assault and Violence Education (SAVE) of Essex County regarding the Memorandum of Understanding (MOU) that exists between the two facilities. It was confirmed that SAVE will provide services to KN including, but not limited to, a 24 hour per day, seven days per week Sexual Assault Hotline and medical accompaniment and advocacy for a resident victim of sexual assault and coordinate a forensic examination by a Sexual Assault Nurse Examiner (SANE). A telephone interview with a SANE at the Beth Israel Medical Center Emergency Department, Newark, NJ. confirmed that examinations would be conducted there.

File Review

Following the interviews, the Auditor reviewed the files requested during the pre-audit phase. The Auditor reviewed ten personnel files to establish compliance with PREA training mandates and background checks. The Auditor reviewed three files for facility contractors. Screening and intake procedures were evaluated by reviewing ten random resident files which included, a vulnerability assessment instrument, and resident education verification documentation.

Investigations

During the current auditing period, there were no reported allegations of sexual abuse/sexual harassment. All investigations are handled by the Newark Police Department (NPD), New Jersey Department of Corrections (NJDOC) Office of Community Programs (OCP), or the NJDOC Special Investigation Unit (SID). Information is transmitted quickly to the appropriate investigating agency. The PREA Coordinator is responsible for receiving verbal and telephonic referrals 24 hours a day, seven days a week. Additionally, abuse investigation outcomes and general protective services assessment outcomes are submitted to, reviewed by, and finalized by the PREA Coordinator.

Closeout

A closing meeting was held with the administrative staff on the evening of September 20, 2018. Discussions centered around the audit process, preliminary findings, and the post-audit process. The auditor thanked the staff for their hard work and dedication to the PREA process.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special

housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

Kintock Newark (KN) is owned and operated by The Kintock Group, Newark, NJ. It is a private, not-for-profit operation contracting exclusively with the NJDOC. The Kintock Group Newark community corrections programs have two active facilities. One houses the NJDOC Work Release program for adult male offenders while the other houses female and male parolees enrolled in the Stages to Enhance Parolees Success (STEPS) program. Combined, 129 out of 183 program participants are employed and seven residents are attending higher education or trade school. These programs serve as a second chance for the residents to make better decisions and engage in different activities.

STEPS PROGRAM

The Kintock Group STEPS program consists of both male and female residents coming directly from state prison, county jail, or from the district offices throughout the state on graduated sanctions. The programming component consists of Life Skills, Stress and Anger Reduction, Drug and Alcohol Counseling, Gang Intervention, Employment Readiness, and Computer Literacy. Rutgers New Jersey Medical School began working with the Kintock Group STEPS program 12 years ago as part of their Public Understanding of Medicine in Action (PUMA) program. It started as an 8-week session and has now evolved into a 10-week session due to the enthusiasm of both the medical students and residents. Approximately 10 to 12 medical students lead the mini-health lectures on topics that include exercise, nutrition, mental health, immunizations, vaccines, stress, and a variety of medical conditions such as cardio-vascular disease, cancer, diabetes, and sexually transmitted illnesses.

Once the residents have moved out of the treatment phase and into the work-release phase of the program, they begin job searching with the assistance of an employment specialist. At the time of the audit, thirteen of twenty-one work eligible residents were employed at various work sites. The average length of stay for a STEPS resident is 90-180 days and once they have successfully completed the program, the Parole Board releases them back to their parole district to continue the path to success.

NJDOC TREATMENT TO WORK RELEASE PROGRAM

The Work Release program serves to assist the residents with securing the community linkages and resources that they will need upon their release. The staff works closely with community agencies on the basics from obtaining credentials such as birth certificates, social security cards, and non-driver's identification to locating adequate housing.

The employment services department staffed with employment counselors work with the residents to identify employment opportunities that match their skills. Residents have an opportunity to enroll in GED, college or vocational/educational classes.

At the time of the audit, 95 of the 166 residents were employed; one was enrolled in GED; five were enrolled in community college; and two were enrolled in culinary arts training classes. KN presently works with over 38 employers who have given residents employment opportunities. KN receives calls from employers weekly requesting additional residents to fill vacancies. The employers appreciate the benefit of having an employment counselor to coach the residents on workplace issues. Once residents are employed, their case managers work with them on managing their finances. Residents are required to open savings accounts and make regular deposits according to their pay. This is also an opportunity to make payments towards their restitution, fines, and child support. For many residents this is the first time they have been in a position to be responsible for themselves, utilizing pro-social resources. They share how being in the community and interacting with others while at school and at work gives them a different perspective and feeling of value.

Summary of Audit Findings

*The summary should include the number of standards exceeded, number of standards met, and number of standards not met, **along with a list of each of the standards in each category.** If relevant, provide a summarized description of the corrective action plan, including deficiencies observed, recommendations made, actions taken by the agency, relevant timelines, and methods used by the auditor to reassess compliance.*

Auditor Note: No standard should be found to be "Not Applicable" or "NA". A compliance determination must be made for each standard.

Overview

During the auditing period, KN reported zero allegations of sexual abuse/harassment in the Pre-Audit Questionnaire (PAQ). There is a well established zero-tolerance culture throughout with documentation addressing all areas of PREA. The agency, Kintock Group, maintains a broad Central Administration set of PREA policies as well as specific, detailed policies for the facility. A random review of ten (9%) personnel files for background checks and 86 (100%) of the employee training files established compliance with PREA training mandates and revealed that hiring and promotion practices are consistent with sexual abuse safety measures.

The Auditor found that the facility administration have a strong commitment to PREA and the zero-tolerance policy. Significant time and resources have been employed to ensure a sexually safe environment for the residents at Kintock Newark. From the pre-audit phase to

the completion of the on-site visit, the professionals caring for the residents have proven to be organized, efficient, and well-prepared.

Staff Interviews

Interviews with staff revealed they received and had a good understanding of PREA policies. They were knowledgeable about their roles in prevention, reporting, and their responsibilities in the event of a PREA related incident, particularly first responder duties. They were able to verbalize the steps they would take if they were the first responder to a PREA related incident. Reporting mechanisms were displayed in a conspicuous manner and residents and staff members were aware of all reporting methods available to them. A review of the KN staff training curriculum was completed by the Auditor and records support the finding that all staff have received comprehensive PREA training. Staff appeared truly interested and vested with the residents and expressed a true desire to see the residents succeed.

Resident Interviews

Interviews with residents indicated they have a good understanding of the PREA safeguards and the zero-tolerance policy. Comprehensive resident PREA education is provided in written form (i.e. Resident Handbook, entrance packet), personal instruction, videos, and posters. Twenty (17%) completed vulnerability assessment instruments were reviewed by the Auditor and revealed that intake and classification assessments are efficient and seamless in addressing referrals based on victimization or abusiveness screening data. Residents acknowledged the admissions screening process included questions regarding any history of sexual abuse or victimization and whether they would like to identify a sexual preference. Residents stated during interviews that they were aware of how to report abuse internally and externally. Residents indicated they trust the KN staff and would feel comfortable reporting abuse to them at any time. The residents demonstrated understanding that the facility has appropriate medical and victim advocacy networks in place. They affirmed that they felt safe and cared for in the facility. Staff and resident interactions were observed by the Auditor and appeared respectful and positive.

1. KN Pre-Audit Questionnaire
2. Policy 3.05 Personnel/PREA Sexual Abuse/Assault
3. Facility Staffing Plan
4. Interviews with the following:
 - a. SA/PCM
 - b. PREA Coordinator

Findings:

The policies require KN to review their staffing plans on an annual basis. A review of the staffing plan and an interview with the SA support compliance with this PREA standard. The SA acknowledged that when developing the annual staffing plan, each element of the standard is carefully considered. With policy 3.05 as a guide, the administration considers safety and security issues when they review their staffing plan. According to policy, KN adheres to minimum staffing ratios of 1:15 during day hours, 1:12 during afternoon hours, and 1:15 during evening hours. Based on interviews with administrative staff, the agency has provided all necessary resources to implement programs and procedures to ensure compliance with PREA standards. The audit included an examination of all video monitoring systems, resident access to telephones, and rosters. Video cameras with monitoring capabilities are visible throughout the facility and observed by the Auditor. The Auditor observed cameras being monitored by the SA as well as by staff in a locked Control Center. Additionally, documentation of unannounced rounds covering all shifts by administrative staff was reviewed. Policy prohibits staff from alerting other staff members that supervisory rounds are occurring and interviews with staff confirmed unannounced rounds to all areas of the institution are conducted on a weekly basis.

9. Interviews:
 - a. Random staff
 - b. Residents

Findings:

Policy establishes that cross-gender strip and/or cross-gender body cavity searches are prohibited, except in emergency situations or when performed and documented by a medical practitioner. Staff indicated they received cross-gender pat search training during initial training. The facility has implemented a policy that all staff working the unit will announce themselves prior to walking onto the unit to allow residents the opportunity to prepare themselves from a privacy perspective. The residents interviewed acknowledged they are able to shower, dress, and use the toilet privately, without being viewed by staff of the opposite gender.

Staff were aware of the policy prohibiting the search of transgender or intersex residents for the sole purpose of determining the resident's genital status. Resident interviews revealed that during the auditing period, there were no exigent circumstances requiring cross-gender viewing of a resident by a staff member.

6. Review of intake information signed by residents
7. Review of PREA Screening Checklist
8. KN PREA Screening High Risk Tracking Log
9. Interviews:
 - a. Counselor

b. Site Administrator

Findings:

Policies require the use of a screening instrument (reviewed by auditor) to determine the appropriate housing, bed assignment, work assignment, education, and other program assignments, with the goal of keeping residents at high risk of being sexually abused/sexually harassed separate from those residents who are at a high risk of being sexually abusive. All residents are screened within 72 hours of arrival at the facility per policy. A review of the documents associated with these procedures indicates the information from the risk screening is used to ensure the safety of each resident. Documentation and interviews confirmed that housing and programming assignments are made on a case-by-case basis and residents are not placed in housing units based solely on their sexual identification. The facility does not use isolation type housing for residents at risk of sexual victimization. The SA/PCM indicated that should this situation arise, the resident will be transferred to another living unit or facility to ensure their safety.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Evidence Reviewed (on-site visit, documentation, staff and resident interviews):

1. KN Pre-Audit Questionnaire
2. Policy 3.05 Personnel/Sexual Abuse/Assault
3. Interviews with the following:
 - a. PREA Coordinator
 - b. SA/PCM

Findings:

According to documentation and interviews, screening has not resulted in any disclosures of prior victimization or perpetrated sexual abuse. Procedures are in place to offer follow up medical and mental health treatment if the staff become aware of such abuse or perpetrated abuse. Interviews confirmed that treatment services are offered without financial cost to the resident. Policy states that residents requiring treatment to meet with medical and mental health practitioners and that treatment plans must be based on the resident's assessed risk. Policy establishes that the treatment needs of residents are identified and prioritized and is kept in the resident permanent treatment file. There had been no victims or perpetrators identified at the time of the on-site visit, therefore no files were reviewed. This was also confirmed through interviews with the SA and the PREA Coordinator.
